11th International School on Digital Government - OpenGov2024

SCHOOL OF ENGINEERING - Department of Information and Communication
Systems Engineering
26 Aug 2024 to 30 Aug 2024 | Samos

Scientific Coordinator : Charalabidis Yannis, Professor,
Department of Information and Communication Systems Engineering,
University of the Aegean

The 11th International Summer School on Digital Government, organized by the Department of Information and Communication Systems Engineering of the University of the Aegean, takes place in the beautiful island of Samos, and provides a unique opportunity for participants to interact with internationally acclaimed scientists and researchers in the domain of ICT-enabled Governance.

Involving speakers from the academia, industry, and governments, OpenGov2024 focuses on Technologies and Applications for Government 3.0, a really growing, diverse and challenging domain. The summer school participants will get the chance to develop their skills and grow their knowledge in the areas of policy modeling, information management, disruptive technologies in governance, open data, data-driven decision making, smart cities, and more.

The main aim of OpenGov2024 Summer School is to enable the participants' involvement in Open and Collaborative Governance issues and their accompanied technologies with hands-on Workshops, interactive sessions and discussions around the most prominent technologies of the domain (e.g., big and open linked data, blockchain, artificial intelligence and machine learning, large language models, crowdsourcing mechanisms, policy modelling and simulation, opinion mining, sentiment extraction, and more), and offer appropriate additional skills towards shaping a successful researcher, a competitive employee, and a well-informed public servant.

For more information visit: <https://summer-schools.aegean.gr/opengov2024>

Students of all levels and departments of the University of the Aegean are entitled to a 50% discount.
